## **Hospital Rooms:**

- These rooms are tested to CDC requirements, testing to include:
  - Supply and/or exhaust air flows (FPM/CFM),
  - Room volume, air change rates,
  - Room pressures,
  - Temperature & relative humidity readings.
- Optional tests or services can include:
  - HEPA Filter leak testing & repair or replacement,
  - Light Intensity,
  - Sound levels,
  - Vibration measurements,
  - Airborne non-viable particle counts,
  - Temperature & relative humidity detailed in a grid pattern.
